

Run Capital Partners — Website Handover Document

Original date: May 4, 2026

Last updated: May 11, 2026

Prepared for: Alice (RCP Assistant) and any IT person taking over

1. What This Is

This is the complete source code for the Run Capital Partners website at **<https://runcapital.partners>**. It is a static HTML/CSS website — no backend, no database, no build step. You edit HTML files directly and deploy.

2. Where Everything Lives

What	Where
Source Code	GitHub: https://github.com/lisatyshchenko95/runcapital-redesign
Hosting	Vercel: https://vercel.com (project: runcapital-redesign)
Domain DNS	Squarespace (DNS managed via Google Cloud DNS)
Live Site	https://runcapital.partners
Backup URL	https://runcapital-redesign-zeta.vercel.app

3. Tech Stack

- **Pure HTML/CSS** — no framework, no React, no build tools
 - **Fonts:** Google Fonts (Playfair Display, Inter, Cinzel, Cormorant Garamond)
 - **Hosting:** Vercel (free tier, static files)
 - **Version Control:** Git + GitHub
 - **No database, no server, no backend**
-

4. Project Structure

```

runcapital-redesign/
├── index.html                # Homepage
├── style.css                 # Main shared CSS
├── opening.css              # Homepage-specific CSS
├── amc-style.css            # CSS for service pages

```

5. How to Make Changes

Simple text/content changes:

1. Open the `.html` file in any text editor (VS Code recommended)
2. Find the text you want to change
3. Edit and save
4. Deploy (see section 6)

Adding a new team member:

1. Copy an existing bio page (e.g., `denis-rondanini.html`)
2. Replace name, title, photo, summary, expertise, career, contact email
3. Add their photo as `firstname-lastname.jpg` in the root folder
4. Add a link to them on `index.html` (team section) and relevant service pages
5. Deploy

Updating the footer:

The footer is duplicated in every HTML file. To change it, you must update it in **all** HTML files.

CSS:

- **Global styles:** `style.css`

- **Homepage:** `opening.css`
 - **Service pages:** `amc-style.css`
 - **Bio pages:** each has inline `<style>` in the `<head>`
-

6. How to Deploy

Option A: Vercel CLI

```
cd runcapital-redesign
vercel --prod
```

Option B: Git push (then deploy from Vercel)

```
git add .
git commit -m "your change description"
git push
vercel --prod
```

Option C: Vercel Dashboard

1. Go to <https://vercel.com>
2. Find project `runcapital-redesign`
3. Click "Deployments" > "Redeploy"

7. How to Get the Files (Backup / ZIP)

Download as ZIP:

1. Go to <https://github.com/lisatyshchenko95/runcapital-redesign>
2. Click the green **"Code"** button
3. Click **"Download ZIP"**

Or clone via Git:

```
git clone https://github.com/lisatyshchenko95/runcapital-redesign.git
```

8. Domain & DNS Configuration

Setting	Value
Domain	runcapital.partners
DNS Provider	Squarespace / Google Cloud DNS
A Record	@ → 216.198.79.1 (Vercel)
CNAME	www → 69a14985654c6807.vercel-dns-017.com.
TXT	_vercel → verification string

If the site goes down, check these DNS records in Squarespace are still pointing to Vercel.

9. Accounts Needed

Service	What For	Who Has Access
GitHub (lisatyshchenko95)	Source code repository	Lisa
Vercel	Hosting & deployment	Isaiah / project team
Squarespace	Domain DNS management	Luca / Lisa

10. Important Notes

- **No build step** — files are served exactly as they are. What you see in the folder is what goes live.
- **Mobile responsive** — all pages work on desktop and mobile.
- **EN/IT language toggle** — built into pages using `data-en` / `data-it` attributes.
- **Footer** — same across all pages, must be updated in each file individually.
- **OG meta tags** — each page has Open Graph tags for link preview images (WhatsApp, LinkedIn).
- **Videos** — hero videos autoplay silently. `video-fallback.js` handles iOS.
- **Future changes via Claude Code** — this project can continue to be maintained using Claude Code. Open the project folder and describe what you need.

11. Emergency: Site Down?

1. Check if `https://runcapital-redesign-zeta.vercel.app` works (bypasses DNS)
2. If yes → DNS issue. Check Squarespace DNS records match section 8 above.
3. If no → Vercel issue. Log into Vercel and check deployment status.

- 4. To quickly restore → redeploy from Vercel dashboard.

12. Recent Updates (since first handover, May 4 2026)

New offices

- **Rome office** added to the footer of all 44 pages: *Via Leonida Bissolati 54, 00187*
- Hero locations pill on the homepage now includes **Rome / Roma**

Homepage

- Institutional Partners marquee rebuilt with current partners: **Actarus Renewables, Eterna Capital, BBVA, Vontobel, Leonteq, UBS, Marex, J. Safra Sarasin, Goldman Sachs**
- New `logos/` folder holds the original brand PNGs and the **white-silhouette** versions (`*-white.png`) actually rendered in the marquee
- Italian hero title changed: "*Il Tuo Percorso Patrimoniale*" → "*La Tua Boutique Finanziaria*" (EN unchanged)
- Marquee gap, ordering and per-logo size/position tuned (small inline `transform:` styles on a few entries — Leonteq, Marex, Goldman, Eterna)

Team

- **Index team grid** re-ordered. Leadership tier: Luca Padovan · Cesare Trebeschi · Enrico Fiore · **Giovanni Randazzo** (promoted from full team) · Enrico Caporin. Michele Furlan moved to the full team.
- **Wealth Advisory page** team grid expanded to 4 members: Luca Padovan, Riccardo Perrone, **Patrizio Caringi**, **Enrico Caporin**. Layout is 4 in a row on desktop, 2 per row on mobile.
- Contact CTA on Wealth Advisory now mails `r.perrone@runcapital.partners`

Title changes (applied across all pages where the person appears)

- **Riccardo Perrone**: `Relationship Manager` → **Family Officer** (EN + IT)
- **Enrico De Angelis**: `Business Development` → **Director, Run AM** on the index, his bio, and `run-am.html`. Stays `Director / Direttore` on `asset-management.html`.
- **Mario Famà** timeline (American Express role): IT label `Agente Commerciale` → `Sales Agent` (matches EN, no translation toggle for this term)

Bio page rewrites

- **Giovanni Randazzo** — full rewrite from CV. New title direction (V. President RCP + Director RRCAPITAL Luxembourg), 25+ years experience, real career timeline (Run Capital

Partners, SerendiEquity, Prisma SGR, Gruppo KGS, MIPAAF Technical Secretariat, Compagnia Fondiaria Nazionale, Gruppo Managest), real credentials (Univ. of Palermo Economics & Commerce 1996, Chartered Accountant 1994, IVASS Section E No. 00546121)

- **Danilo Carolini** — rewritten to highlight his international career. Title is now **Head of Alternative Investments**. 7-entry timeline (Run Capital Partners, otala.markets London, Gold Grain Capital VP→Head, BZH Capital Partners NY, Collins Dale Capital Partners London, Macrobond Financial NY intern, Capvision Shanghai intern). Meta items: Based in London · Markets London · New York · Shanghai · Focus Alternative Investments
- **Riccardo Perrone** — added a new credential card "Professional Registered with the Ministry" / "*Professionista nel Registro del Ministero*" (license authorising advisory to family offices)
- **Enrico De Angelis** — removed the Finexia Capital Sarl timeline entry

Assets

- **Sara Longo** — new portrait (`sara-longo.jpg` replaced; cache-busted via `?v=3`)
- **Sport & Wealth page** — tennis-cliff pane removed from the cinematic band (now shows only the forest pitch). New og:image for `/sport-wealth` is `images/sport/forest-pitch-overhead.jpg`

Mobile / iOS fixes

- Wealth Advisory team grid: 4-columns desktop, 2-columns mobile
- Hero locations pill on mobile: **Rome** centered on its own row (5 pills total)
- Danilo Carolini bio meta items: **Focus** now wraps to its own line on mobile so "Alternative Investments" isn't clipped
- Giovanni Randazzo bio: `<meta name="format-detection" content="telephone=no">` added so iOS Safari no longer auto-links the IVASS registration number `00546121` as a phone number

Filename changes

- `enrico.html` → `enrico-fiore.html`
- `giordano.html` → `giordano-tomasini.html`
- `fund.html` → `funds-distribution.html`

13. Future Development

- Changes can be made by any developer with access to the GitHub repo

- Claude Code can be used for AI-assisted changes — just open the project and describe what you need
- No special environment setup needed — just a text editor and Git
